Features: add team , maintain groups, time table for playing soccer between groups and some more funtionalities.
Language: Using PHP,Mysql, Html, Css.

odoo- attendance -module -

Features: attendance managment system with handle all record related to student attendance
Language: python + api

Adroid app devolepment -

Features: attendance managment system with handle all record related to student attendance
Language: java + python + api

FYP

FAST NUCES-
Peshawar
Aug 2021 - Jun 2022

Age and Gender Prediction

- Summary: It was our final year project which predict age and gender of a person from an image. we design a web interface through Flask which take an image is a input and predict its age and gender.
- Abstract: Markit basket analysis + Social media apps + Figure out interest of people in social places.
- Field: Machine learning and Digital Image processing.
- Language: python + flask.
- Technologies: Keras + TensorFlow + Resnet-50+ k-train.
- Datasets: keggel + UTKface.

FUTURE GOALS

Vision is to be expert in the following fields:

- Machine learning.
- Artificial intelligence.
- Data science.
- Robotics.
- Back end devoleper.

EXTRA-CURRICULAR ACTIVITIES

Jun 2022 - Present

Sports and Athletic Participation

Much interested in all kind of sports like: volleyball, bedminton, soccer, table tennis, basket ball.

Jun 2022 - Present

Movies

Like different categories of movies like: Classical + Advanct technologies, History, Animations, Real action and Funny but hate dramas and horror based movies because it make me scared.
