•Calendar with Clock- Features: overall feature of normal use calendar with clock(stop watch) Language: assembly language.
• Premier league information system - Features: add team , mantain groups, time table for playing soccer between groups and some more funtionalities. Language: Using PHP,MySQL, Html, Css. • odoo- attendance -module - Features: attendance management system with handle all record related to student attendance Language: python + api
• Adroid app devolepment - Features: attendance managment system with handle all record related to student attendance Language: java + python + api

FYP

Age and Gender Prediction, FAST NUCES-Peshawar Aug 2021 - Jun 2022 •Summary: It was our final year project which predict age and gender of a person from an image. we design a web interface through Flask which take an image is a input and predict its age and gender. •Abstract: Markit baskit analysis + Social media apps + Figure out interest of people in social places. •Field: Machine learning and Digital Image processing. •Language: python + flask. •Technologies: Keras + TensorFlow + Resnet-50+ k-train. •Datasets: kegggle + UTKface.
--

FUTURE GOALS

- Vision is to be expert in the following fields:**
 - Machine learning.
 - Artificial intelligance.
 - Data science.
 - Robotics.
 - Back end devoleper.

EXTRA-CURRICULAR ACTIVITIES

Sports and Athletic Participation Jun 2022 - Present Much interested in all kind of sports like: volleyball, bedminton, soccer, table tennis, baskit ball.
Movies Jun 2022 - Present Like different categories of movies like: Classical + Advanced technologies, History, Animations, Real action and Funny but hate dramas and horror based movies because it make me scared.
