AGE AND GENDER PREDICTION

FAST NUCES-Peshawar

Aug 2021 - Jun 2022

•Summary: It was our final year project which predict age and gender of a person from an image. we design a web interface through **Flask** which take an image is a input and predict its age and gender.

•Abstract: Markit baskit analysis + Social media apps + Figure out interest of people in social places.

•Field: Machine learning and Digital Image processing.

•Language: python + flask.

•Technologies: Keras + TensorFlow + Resnet-50+ k-train.

•Datasets: keggel + UTKface.

FUTURE GOALS

• Vision is to be expert in the following fields:

- Machine learning.
- Artificial intelligence.
- Data science.
- Robotics.
- Back end devoleper.

EXTRA-CURRICULAR ACTIVITIES

SPORTS AND ATHLETIC PARTICIPATION

Jun 2022 - Present

Much interested in all kind of sports like: volleyball, bedminton, soccer, table tennis, basket ball.

MOVIES

Jun 2022 - Present

Like different categories of movies like: Classical + Advanced technologies, History, Animations, Real action and Funny but hate dramas and horror based movies because it make me scared.
